

# ESPECTRA

“... AND ALL STARTED WITH A SMALL FLASH OF LIGHT”

# Presentation

Espectra is a visual and poetic performance on stilts that offers a unique sensorial experience through light, movement, and scenic elegance. Four imposing figures walk through the space in mirrored costumes that capture and multiply the light, generating a universe of sparkles that envelops the viewer. With a futuristic and delicate aesthetic, the figures combine majesty and fluidity in their movements, evoking beings from another dimension.

The interplay of reflections, the shimmering light that transforms with each step, and the imposing presence of the figures transform each performance into an act of living and ephemeral beauty. A versatile show that adapts to diverse contexts: festivals, parades, nighttime events, openings, cultural fairs, and urban or stage events.

# Synopsis

Four luminous figures emerge onto the stage, refracting the light as they pass. With elegant and powerful movements, they transform the environment, generating visual sparkles that captivate the viewer and invite them to immerse themselves in their luminous, sensorial, and poetic universe.
